Allowable Subject Matter

This Office Action is in response to applicant's communication of 5/30/2006. Currently amended claims 12-14, 23, 28-29, 31 are pending and in condition for allowance.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The claims in this application have been allowed because the prior art of record fails to disclose either singly or in combination the claimed method of inserting into a urethra a concave handle and applying a proximal force on the distally facing surface of the handle to oppose the distal force and maintain the access device in the operative position. The method including these opposing forces on the specific surfaces in maintaining the surgical operative position of the device have not been found in the prior art of record.

Further in regards to claim 28, the claims in this application have been allowed because the prior art of record fails to disclose either singly or in combination the claimed method of assembling a medical access device with the nut in the handle assembly compressing an elastomeric washer the couples the handle assembly by screwing into the sleeve.

The closest prior art of record is Devonec (U.S. Patent Number 6,290,666), however this reference does not disclose a method for inserting a medical device where

the handle contains the concave and convex surfaces being sized and configured to receive two adjacent fingers of the user's hand and the opposing force maintenance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
